

# ADD74F Quad Multiplexer

This Quad Multiplexer fits all Verity systems and cameras. ADD74F is a 4 Channel Multiplexer for a single, dual, triple, and quad image. It is used heavily in the Fire/Rescue industry and is suitable for any situation where a co-driver needs control; i.e. prison buses and armored vehicles. It also has Marine applications: view your engine room, or use as a docking aid.

## QUAD MULTIPLEXER ADD74F

- Supports 4 cameras' video, simultaneous input
- Supports 4 cameras' audio, simultaneous input
- Single, dual, triple, quad image for optional views
- Normal or mirrored picture can be switched separately on each camera
- Separate trigger control wire on each camera
- 1-Channel split trigger wire
- 1-Channel quad trigger wire
- Under the display mode, users can set the single view or quad view by the control box.
- In standby mode, monitor will be on automatically when it's triggered and will switch to the corresponding triggered camera view.
- Working voltage range is 12-32V with self-protect at short-circuit.
