

LV5EP Legal Vision® System

Our New **LEGAL VISION®** 5" Monitor with **Top-Mounted Buttons** takes up 34% less viewing space than conventional 5" monitors. Our secret is in our Patent Pending image processing system which crops out the "fish eye" look and provides a crisp clear image. The resulting image surpasses the requirements of the new Backup Camera Law - even from heights as low as 32 inches off the ground! Our technology will work on normal box truck heights with no distortion to the image.

MONITOR SPECIFICATIONS MLV5E
